Concrete

- ★ Liquid building material
- ★ Made up of cement, aggregates, and water.

Buildings used with Concrete

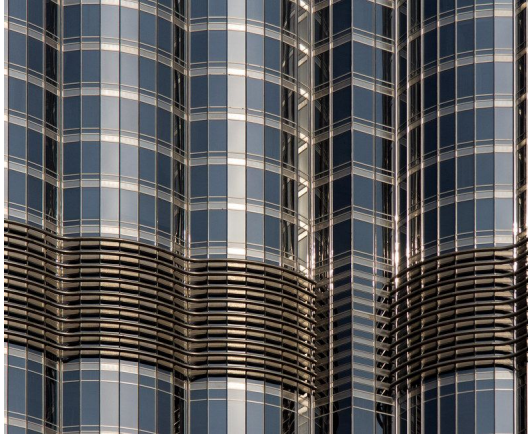

Curtain Wall

- ★ A non-laced bearing wall
- ★ Well-endowed with windows

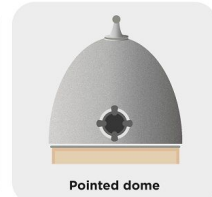

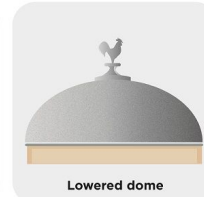

More Curtain Wall Examples

Dome

- ★ Generally hemispherical roof or vault
- ★ Evolved from arches

Real-life Dome examples

Dressed Stone

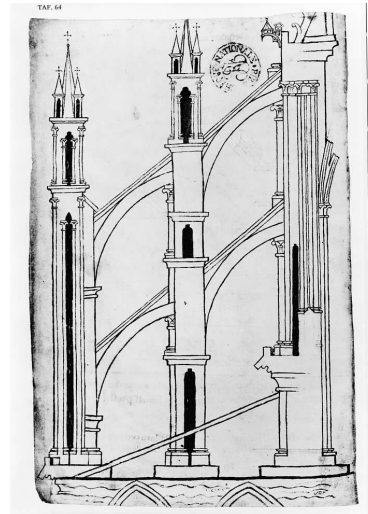

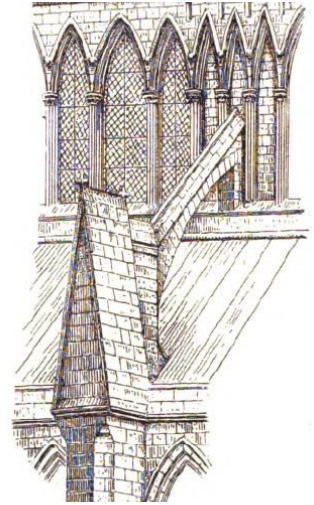

- ★ Stone used for buildings that are cut, trimmed or ground
- ★ Made for a masonry wall.

- Masonry walls are buildings that use masonry materials such as brick, stone or concrete blocks to construct walls

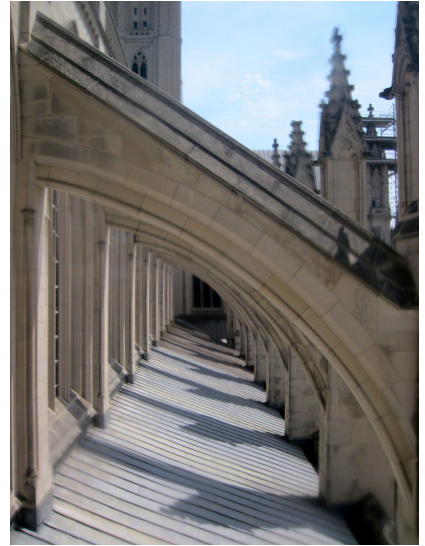

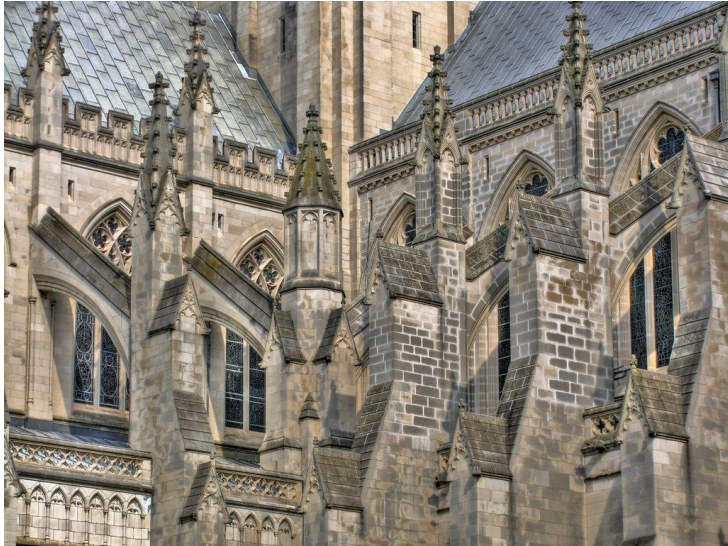

Flying Buttress

- ★ A strut or segment of an arch
- ★ positioned away from the main portion of a building
- ★ Important element in Gothic Cathedrals

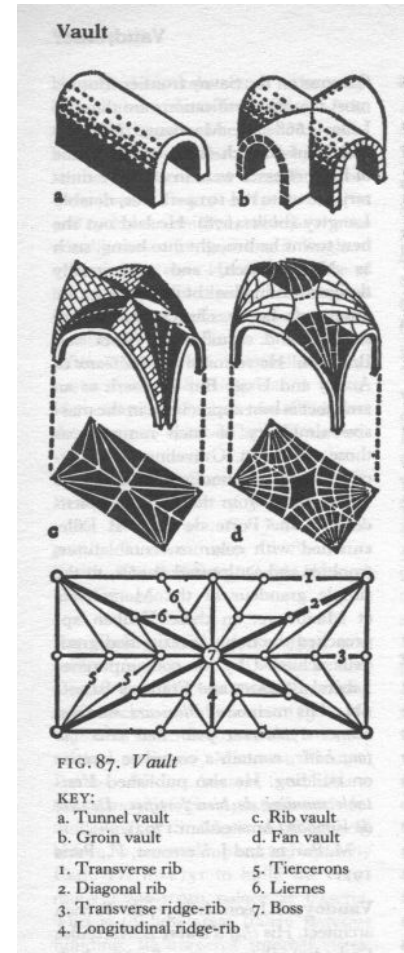

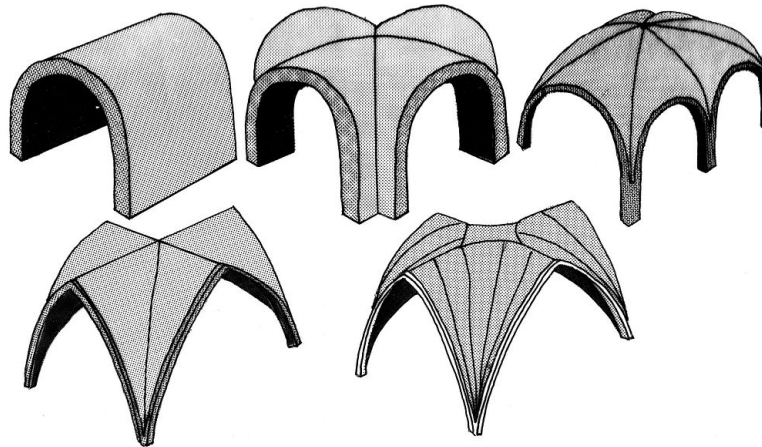

Flying Buttress in Buildings

Groin Vault

- ★ produced by the intersection at right angles of two barrel vaults
- ★ Sometimes the arches are pointed instead of round

International Style

- ★ Architectural style that emerged in european countries through 1910-1920
- ★ Characterized by using modern materials (concrete, glass, steel)
- ★ Focus on building's inner uses
