3C #3: “Kamala HQ”

Propaganda: information, especially of a biased or misleading nature, used to promote or publicize a particular political cause or point of view.

Example:

Function: This photo was posted on August 25th, 2024, coming from the TikTok account **Kamala HQ**. The time of this post was the height of the presidential election between **Harris & Trump**. This post specifically reaches out to the younger generation of America. The account uses modern trends to influence new voters to vote for Harris by posting about **Project 2025** and/or **Trump's plans for the U.S.A.** *Scrolling through this account you can tell they reach for a younger audience. They target their posts to the youth/new voters by hopping onto new trends on social media like the post above. Like in the post, not only is it a*

trend but it's used with humor. The humor depicts colorful rainbow dolphins swimming in water with a rainbow behind them, although the text is a serious topic. This is used constantly in their uploads just by viewing a few of their videos. You can tell they do influence the younger side of the U.S. by the amount of views, shares, & likes they have on their videos. This is propaganda. Most people don't realize it because they see it and think of how funny it is that a political account such as Kamala HQ can know about such new current trends happening in time. Kamala HQ is being run by young people so they can relate easily to the younger generation. They post content that ruins the image of the other team that they're against or posts about Harris' able ideas/speeches.
